

Multi-prop Shop

- RQ: POST <https://kapip-s.hilton.io/hospitality-partner/v2/dcshop/props>
 - You can shop in one of three ways. Check with your API Coach and Implementation Manager on which to use

Pull data for multiple properties

Shop w/o details	Shop using RAC/corporate#	Shop using token
<pre>{ "props": [{"propCode": "CHIDT"}, {"propCode": "CHITD"}], "arrivalDate": "2024-09-20", "departureDate": "2024-09-29", "numAdults": 1, "numChildren": 0 }</pre>	<pre>{ "props": [{"propCode": "CHIDT"}, {"propCode": "CHITD"}], "arrivalDate": "2024-09-20", "departureDate": "2024-09-29", "numAdults": 1, "numChildren": 0, "ratePlanCandidates": [{ "ratePlanCategory": "corporate", "ratePlanId": "HDGM" }] }</pre>	<pre>{ "props": [{"propCode": "CHIDT"}, {"propCode": "CHITD"}], "arrivalDate": "2024-09-20", "departureDate": "2024-09-29", "numAdults": 1, "numChildren": 0, "ratePlanCandidates": [{ "ratePlanCategory": "token", "ratePlanId": "HE" }] }</pre>

- Shopping without details typically means your shopping details are injected by the Hilton APIs
- Shopping using RAC or corporate # allows you to specify which to use in each request
- Shopping using token allows you to specify which token (which maps to one or more rates) to use in each request
- RS: 200 response indicates that the call was successful
 - "statusCode": 1740, "statusMessage": "REQUESTED RATE PLANS ARE NOT AVAILABLE" indicates that there is no availability for the details you specified in the request

Additional Info, Tips & Tricks

1. If requested rate plans are not available, try alternates dates or confirm your Rate Access Code, corporate #, or token with your Implementation Manager or API Coach.
2. For additional info: [Check for Available Rooms | Hilton Dev Portal for documentation](#) see the Multi Property Shop section
